Projects

RoomAid | React Native · GraphQL · Relay · Rails · PostgreSQL | GitHub

A roommate status and communication app for iPhone and Android

- MVP includes roommate status, chatroom, bill breakdown, calendar and authentication
- Agile workflow with task branching using git, TDD with Jest and type checking with Flow
- Stores session token in AsyncStorage to authenticate user upon logging in or loading app

Fbclone | Rails • React • Redux • PostgreSQL • WebSockets | Live | GitHub Social networking platform inspired by Facebook

- Implements SPA architecture with React/Redux frontend and Ajax requests to a JSON API
- Features user authentication with BCrypt ruby gem to store salted and hashed passwords
- Minimizes ActiveRecord queries by fetching all user related data at login with single query
- Live chat feature uses bi-directional functionality via WebSockets with help of Pusher

Advanced Battleship | JavaScript • WebGL • BabylonJS • HTML5 | Live | GitHub WebGL implementation of Battleship: Advanced Mission

- Utilizes a 3D interface with fluid animations to provide immersive and realistic gameplay
- Integrates with Web Audio API to supply sound effects for missile launches and explosions
- Provides smart AI for computer player which emulates intuitive human player reactions

Skills

C · C++ · Node · JavaScript · Ruby · Python · HTML5 · CSS3 · SQL · WebGL · WebSockets

React · React Native · GraphQL · Relay · Redux · Angular · Ruby on Rails · Django · PostgreSQL

AWS · ¡Query · BabylonJS · TDD · RSpec · Jest · Capybara · Jasmine · Selenium WebDriver

Education

Web Development | App Academy | New York | Fall 2016

 Graduated from an immersive full-stack web development bootcamp with less than 3% acceptance rate and rigorous weekly assessments to ensure retention of advanced concepts such as ADTs, algorithm time/space complexity, and meta programming

Computer Science | Santa Monica College | Los Angeles | Spring 2012 - Fall 2014

- Courses in data structures, computer architecture, linear algebra, C++ and OOP
- Left in good academic standing to pursue software engineering in a more direct path such as through personal projects and bootcamp enrollment

Professional Experience

Coding Instructor | App Academy | New York | Jan 2017 - Present

 Provide coding lectures, code reviews, pairing practice and answers to technical questions for students learning Ruby in preparation for bootcamp admission at App Academy

General Manager | M Café de Chaya | Los Angeles | Oct 2013 - Jan 2016

 Lowered operating costs by analyzing P&L reports, accounting, vendor contracts, MICROS POS configuration and delivery systems with various custom built tracking systems
